Yousef Al-Mesaeed

yousefalm@outlook.com
https://github.com/youse-falm1

Skills

- Languages: HTML, CSS, JavaScript, Python
- Databases: MySQL, MongoDB, PostgreSQL
- Libraries: jQuery
- Version Control: Heroku, GitHub, Git
- Frameworks: Flask, Django, Bootstrap

Projects

- **Emerge Fitness Website** (https://github.com/yousefalm1/emerge-fitness-website) Developed a website for a local gym, "Emerge Fitness," to enhance online presence and provide valuable information to clients. The website serves as a user-friendly platform for visitors to explore gym offerings, get to know the coaches, access opening hours, understand the gym's mission, and conveniently contact the gym for inquiries. HTML5, CSS

- **Football Quiz** (https://github.com/yousefalm1/football-quiz) Developed an interactive multiple-choice quiz game, "Football Quiz," designed to assess football knowledge, encompassing players, teams, and historical facts. The game offers two engaging difficulty levels: easy and hard. In the easy mode, beginners can enjoy a relaxed quiz experience, while the hard mode introduces an adrenaline-pumping timer for a more challenging and exhilarating gameplay experience. HTML5, CSS, JavaScript

- **To-Do List** (https://github.com/yousefalm1/to-do-list) Created a dynamic and user-friendly task management tool called "To-Do List." This web application is designed to empower users to efficiently track tasks and maintain organization in their daily lives. Python
